

# Merredin (Cunerdin) Solar Farm

---

Bruce Rock Road  
Merredin, Western Australia 6514  
Australia

Stellata Energy has announced plans to develop a 120 MW solar farm to be located about 5 kilometres south south-west of Merredin, half way between Perth and Kalgoorlie. The proposed solar farm will have a capacity of approximately 120 MW and will comprise between 360,000 and 400,000 tracking solar panels. Stellata has joined with the UK investment specialist Ingenious to develop a \$200 million "solar pipeline" in Australia. The solar farm has planning approval for battery storage. In October 2018, the solar farm was purchased by Risen Energy.

Company: Risen Energy  
Capacity (MW): 120  
Status: Planned  
Start Year: 2019  
Technology: Photovoltaic  
Fuel: Solar  
Estimated Output: 260  
Source of Information: Stellata Energy website (June 2017)
