

# Delburn Wind Farm

---

Strezlecki Highway  
Delburn, Victoria 3871  
Australia

OMSI Australia is proposing to develop a 53-turbine wind farm with a capacity of 300MW at Delburn in Victoria's Latrobe Valley. The wind farm will overlook the site of the now closed Hazelwood coal-fired power station and, once completed, would generate about 10% of the capacity that Hazelwood provided to the grid. Construction is planned to begin in 2022.

Company: OMSI Australia  
Capacity (MW): 300  
Status: Planned  
Start Year: 2024  
Technology: Wind turbine  
Fuel: Wind  
No. of Turbines: 53  
Source of Information: OMSI web site (May 2019)
